

Name of project: Production of flexible thin film aerogel

Name of project supervisor: Prof. Chul B. Park

Contact person: Solmaz Karamikamkar

Email of project supervisor: solmazkk@mie.utoronto.ca

Description of your project: The study on how the gelation reaction can participate in the GnP's inclusion in the aerogel backbone during the sol-gel process to strengthen the gel's body by investigation of the effect of the spinodal decomposition process in creating a co-continuous morphology in the GnP's orientation and dispersion.

Who should apply for this project- MEC, IND, both? MEC or CHEM
