

Design of Skin Printer

In collaborations with researchers at Sunnybrook Hospital our research group develops a 3DBioprinter for the continuous formation of skin substitutes.

The summer research project will be focused on aspects of a next generation skin printer design.

Please send your CV and (unofficial) transcripts to Prof. Axel Guenther at axel.guenther@utoronto.ca.

Qualifications:

- Previous design experience
- Interest in Engineering Design
- Proficiency in Solidworks, AutoCAD and Labview

Supervisor: Prof. Axel Guenther
