Job Title: Manager of Manufacturing
Type: Full-Time

Do you want to be part of BresoTec, an ambitious Toronto based Canadian medical device start-up working with sleep disorders? Do you want to take a leading role in launching a new technology for diagnosing sleep apnea? Are you motivated by bringing ideas to life and working in a fast growing cross-functional team? Do you have what it takes: A proven track record in manufacturing and product development, a disciplined mind-set, strong communication skills and a focus in medical devices?

If so, this may be your opportunity to pursue a challenging position as manager of our manufacturing and product development team and take part of our exciting journey, building and growing BresoTec in Canada and beyond.

About BresoTec Inc
BresoTec’s ambition is to develop an innovative new generation of sleep management solutions and make better sleep quality easy and accessible to all. BresoTec’s first product, BresoDx®, is an innovative device that uses proprietary technology based on acoustics and movement recording as an aid in the diagnosis of sleep apnea. BresoDx® is the world’s first cordless home sleep testing device. BresoDx® is clinically validated and is ready for mass production and broad commercialization. BresoDx® received Health Canada approval in December 2014 and the CE Mark in February 2016.

We have started the global launch BresoDx® is around the corner - come join us!

About the job
We are looking for a highly motivated, highly skilled, and strategically minded manager to join our cross-functional team to lead our manufacturing, quality assurance, product development and pipeline development for the launch of BresoDx®, and upcoming products in Canada and abroad.

You will manage our team of quality control and firmware/hardware and software specialists to secure reliable and scalable manufacturing, to continue the improvement of our current product and develop new products within sleep apnea and beyond while ensuring conformity with the ISO 13485 standards.

Your responsibilities will include:
- Develop and oversee quality assurance process for product manufacturing (currently at a 3rd party)
- Develop and implement plan for manufacturing scalability
- Manage inventory and manufacturing planning in liaison with the commercial and finance teams
- Drive continuous improvement of current product’s manufacturing and quality assurance processes, as well as hardware and firmware
- Ensure compliance with relevant ISO and regulatory requirements
- Work closely with the research and development team to ensure rapid and successful translation of inventions into reliable and affordable manufactured products
- Work closely with the cross-functional team members and management team in the development of an engaging work place and the successful growth of BresoTec

Your qualifications
To master the job, you need excellent analytical and communication skills and a good understanding of ISO 13485. Fluency in both spoken and written English is a requirement. You are a professional engineer. You have 5-15 years’ experience in a manufacturing and product development role in an ISO 13485 environment, preferably covering quality assurance design and implementation, inventory management as well as hardware, firmware and software development.
On the personal side, you have a positive can-do attitude and are disciplined and reasoned in your analysis. You are able to align team members to standards that you have set, and are able to manage several competing timelines, such as documentation control for outgoing product, and the design history files for new products coming to market. You are comfortable leading engineering initiatives and providing training for other team members.

At BresoTec, your skills, dedication and engagement help us improve the lives of people living with sleep apnea. We offer you an opportunity to be part of a fast-growing company with global reach, where engagement and dedication are met with opportunities for individual development.

Please submit your resume and cover letter, along with any other material, to hr@bresotec.com as soon as possible. Candidates will be assessed as applications are received. Only candidates considered will be contacted.
