

Mechanical & Industrial Engineering
UNIVERSITY OF TORONTO

Thesis Projects (MIE498 H/Y) 2018–2019

Title/Topic: Energy storage and conversion, fuel cells, and hydrogen production

Description:

Projects are available for 4th-year students interested in energy storage and conversion, fuel cells, and hydrogen production. Interested students should email me with '4th-year thesis' in the subject line. Capstone design projects are also available in these areas, in case any students are still looking for projects.
