

MIE - H&S - 08 - Personal Protection

Personal Protection

1. Safety glasses must be worn when any kind of cutting or grinding is performed, or when going into an area where others are doing the same type of work.

Safety glasses

2. Safety boots are optional, except when heavy parts are to be moved or worked on. Open toe shoes must not worn at the work site or in the laboratories.

Safety boots

3. Gloves should be worn when working on sharp objects. No gloves should be worn when working around moving machinery. Gloves can become entangled in machinery leading to injury.

4. When working with chemicals appropriate gloves, apron, and face shield must be worn according to instructions given in the MSDS.

Rubber gloves and apron

5. When working a dusty environment a dust mask should be worn.

Dust masks

6. Good ventilation must be maintained in the work area.

7. Hearing protection must be worn when working in a noisy environment. Please refer to warning labels on the equipment or consult your supervisor.

Ear protection

Please proceed to take the Test for this section. Answering 4 out of 6 questions is a pass and you may re-take the test if necessary (up to 3 times).
